

## 6.1 SHARING, SHARING

**Objective:** Share objects evenly into two groups.

### Instructions

1. Gather a box or pile of small toys, plastic bricks or beads for example and put them at a start point
2. Set up two other stations some distance away
3. Count out 12 items at the start. Run and distribute one item at a time, alternating between each station
4. How many are at each station? That is half of 12.

### Challenge

Increase the number of objects you share between the two stations – to 16, 20 and then 24.

## Homework Guide Parents

### Dear Parents

Welcome to the Teach Active homework activities. Here you will find dozens of different activities for each year group, all designed to complement your child's learning in school, in a fun and active way.

Simply click on homework, select your child's year group, then the area of maths and a choice of activities will be there. You can download them as PDFs, print them, or view them on your tablet or device.

We have tried to allow for different settings and home environments. Most activities can take place indoors or outdoors. There is a minimal amount of equipment needed. This will either be things you will have at home, such as dice or a stopwatch on your phone, or cards and help sheets that can be printed off at school or home. Number cards could even be made at home. Generally, the bigger the space your child can use, the better – they'll be getting more exercise that way.

Each Homework Activity Card has a key learning objective, a fun title, what you need, detailed instructions, an extension (challenge) activity, what to record for the teacher, a healthy fact, survey question and exercise challenge. Plenty to get on with!

Your teacher may set particular activities for the class or your child regularly, or you may choose to select different activities for your child as the time and circumstances suit, maybe in the school holidays, for example.

### Happy Homeworking!
